Subject: Microsoft Settlement

I suggest that we accept the settlement that was worked out and stop trying to spend more money for something that has been taken care fo . It is hurting the PUBIC in many ways which includes, stock price and value dropping and loosing various mutual funds and individuals, costing more to buy software , and destroying the belief that you or anyone can start a business and make it grow. We are helping those companies that cannot do it without the unfair help of government.

Thanking you in advance for your consideration.

Yourstruly,

William Fongeallaz
